<b>Prototype: SMP-Y1XY35 - 0L853L- Plus 1X fit</b> 13 comments	<p>#1 May 29, 2025 02:21 by Crystal Schmeltz  Target</p> <p>Hi Victor Quevedo, Thank you for the note. Plus spec been created based on current Missy meas. Understand Missy sample been submitted to Missy TD for approval. Please let me know if Missy make any spec adjustment. I might need to modify Plus spec. Also I noticed a lot of meas error with Missy spec- chest, sweep, slv opening all should be "full meas" - not 1/2 meas- since grading are full grading. I don't usually like to give armhole straight meas as well as X-chest/X-bk- please reference attached pattern for proportion of X-shoulder with the relationship of X-chest/ X-bk. I don't provide shoulder slope- follow attached reference pattern. This pattern- body is more fitted than your style. You may adjust based on spec Best Crystal</p>

Can you please send 2 options of Plus sample (based on the 2 spec I created)- that way we can save time. Best Crystal</p>

However Plus can not issue eval before Missy. I need your help with 2 things. 1- Please make these adjustment based on attached and send me a screen shot of revised pattern compare to one of the knit top reference pattern I sent you in the past 2- Once you receive Missy final approval. Please review and let me know anything adjustment Missy made that Plus should consider adjust as well. Best Crystal</p>
